

FOR IMMEDIATE RELEASE

ISLAND ENERGY SERVICES SAFELY AND SUCCESSFULLY COMMISSIONS ITS KAPOLEI FUEL STORAGE FACILITY WITH AN INITIAL SHIPMENT OF FUEL ABOARD THE VESSEL EMPIRE STATE

The commissioning marks the readiness of the Kapolei facility to support the needs of the evolving U.S. Department of Defense bulk fuel requirements in the Pacific region, including the defueling of the Red Hill Bulk Fuel Storage Facility

Kapolei, Hawai'i – Oct. 20, 2023 – Island Energy Services, LLC (“Island Energy Services”) announced today that an initial shipment of fuel has been received into its Fuel Storage Facility from the vessel Empire State, marking a full commissioning of its facility in Kapolei. The shipment also marks the start of defueling plan of the Red Hill Bulk Fuel Storage Facility.

Island Energy Services President and CEO Jon Mauer stated, “The full commissioning of our Kapolei Fuel Storage Facility has successfully been executed with the receiving of an initial shipment from the vessel Empire State. It is not lost on us as a local company the importance and critical responsibility of providing fuel storage solutions for our military partners. We look forward to providing this critical service to our military partners for years to come.”

The commissioning encompasses five fuel tanks that have a storage capacity of 1.2-million barrels, with six other existing fuel tanks that have been modified and converted to store an additional 300,000 barrels of fuel. Four of the new tanks are 175-feet in diameter and 64-feet tall, while one tank is 138-feet in diameter and 56-feet tall. Along with the new storage capabilities, 15,000 linear feet of new piping, more than 60,000 linear feet of cables and wiring, a new terminal automated control system, and new fuel filtration systems to ensure product quality were put into service.

In August, Island Energy Services held a blessing for the fuel storage facility, the company’s largest project, following a contract award to provide 1.5 million barrels of fuel storage in support of the military’s requirements in the Pacific region.
